The monetary value of securities for which application for listing is made will be determined as follows:

- The number of securities for which application for listing is being made, is multiplied by the issue price per security;
- in respect of capitalisation issue, where no market related price is attributable to the securities to be listed, they will be deemed to have a value calculated by multiplying the number of securities listed by the closing price on the declaration date; and

- (iii) in respect of introductions, where no price is attributable to the securities, they will be deemed to have a value calculated by multiplying the number of securities listed by the closing price on the first day of trading.
- c. The fees are payable at the time of application except in the case of an introduction when they are due on the day following the first day of trading after listing.
- d. In respect of share incentive and share option schemes adopted by companies, the JSE will grant a block listing (being an application for a total monetary value of securities to be listed in future) for securities issued in terms of those schemes in future. The appropriate fee will be calculated in accordance with the sliding scale detailed above (initial listing fees table) or below (additional listing fees) and will be payable at the time of the application for the block listing. Subsequent issues of securities in terms of the scheme will be subtracted from the initial block until such time as that block is exhausted, at which time an application, together with the appropriate fee, will become necessary.
- e. For those companies that do not wish to purchase a block listing, the following will apply:
  - a) The minimum fee of R2 073.36 (including VAT) will be charged per application for securities to be listed not exceeding a monetary value of R500 000; and
  - b) Applications for the listing of securities that exceed the monetary value of R500 000 will be charged per application in accordance with the sliding scale detailed under initial listing fees (above) or additional listing fees (below).
  - c) Please note there is a slight difference between the tables for initial and additional listing fees. Initial listing fees are due on the initial listing of the security, while additional listing fees are due should further securities be listed on a later date.
- f. Notwithstanding the above, no listing fee shall be payable in respect of the listing of a new security by a listed company that is issued as a direct replacement for a security of that company which is already listed and in respect of which a fee has been paid in terms of paragraphs (a) to (e) above.
- g. In terms of convertible bonds being converted into shares, the JSE will allow for a 30% discount on all tranches issued for the specific purpose of converting the bonds into ordinary shares. This discount will apply exclusively for changing convertible bonds into equity, and will not apply to other convertible instruments e.g., convertible preference shares.

### Additional Listing Fees for Companies: Main Board & AltX

a. The table below applies to Additional Capital Raisings on the Main Board and AltX:

### Annual Listing Fees for Companies: Main Board

a. In respect of each class of security listed, an annual listing fee shall be payable (except during the calendar year in which the first listing of securities is granted) in February of each year.

| Market Capitalisation (R millions) |           | Fee Structure     |                                     |                   |
|------------------------------------|-----------|-------------------|-------------------------------------|-------------------|
| Tiers (ZAR millions)               |           | Minimum (Inc VAT) | Variable on Remainder (per million) | Maximum (Inc VAT) |
| 0                                  | 100       | R63 173.79        |                                     | R63 173.79        |
| 100                                | 500       | R63 173.79        | R420.00                             | R320 847.03       |
| 500                                | 1500      | R320 847.03       | R52.50                              | R398 152.50       |
| 1500                               | and above | R398 152.50       | R5.25                               | R555 912.24       |

- (i) The fee can be calculated as follows:
- Market capitalisation is calculated by taking the average market capitalisation of the securities over the previous year
  - Find the corresponding market capitalisation tier for the security
  - Multiply the residual amount of market capitalisation that exceeds the lower limit of the tier by the variable charge (remember that the variable charge is per million)
  - Add the result of the above calculation to the minimum fee for the appropriate tier
  - Notwithstanding the above, where more than one of the aforesaid classes of securities are listed, the issuer shall pay the higher annual listing fee only. If a listing is terminated on or before 30 June, 50% of the annual listing fee paid will be refunded to the issuer. If the class of security has only a secondary listing on the JSE, 70% of the appropriate annual listing fee is payable. These discounts will be extended to companies listed on the Main Board, Alt-X and those in the empowerment segment.

Main Board Annual Fee Example:

Company with a market capitalisation of R550 million

= ((550 million – 500 million)/1 million)\*52.50 + R 320 847.03

= R323 472.03(Including VAT)

- (ii) In respect of issuers with preference shares listed, an amount of R16 379.80(including VAT); and
- (iii) In respect of issuers with debentures or loan stock listed, an amount of R8 204.04 (including VAT).
- b. A listing of securities may be suspended and ultimately terminated unless fees that are due, but unpaid, are paid within one month after written notice of demand has been given to an applicant issuer by the JSE.
- c. The documentation fees payable by issuers are covered in the Issuer Regulation Documentation Fees section.

#### Initial & Annual Listing Fees for Companies: AltX

- a. The fees for listing of securities are based on the table below, payable to the JSE on the initial listing date of the securities.

### Warrants & Structured Products (excluding Exchange Traded Funds (ETF) & Exchange Traded Notes (ETN))

Fees for Warrants and Structured Products (excluding ETNs and ETFs) are set out below:

- a. Warrants and Structured Products (excluding ETNs and ETFs) listed under Section 19 requirements will be treated the same from a pricing perspective.
- b. The current documentation fee for listing an instrument and the annual fees in respect of such instruments will be replaced by a “package” model as set out in the table below.
- c. Issuers will pre-pay for a number of warrants or structured products which must be issued during the course of the financial year (i.e. January to December). New ISIN issuances constitute new instrument listings.
- d. Unused warrants or structured products will expire at the end of the period. If an issuer requires additional warrants or structured products to be issued, the issuer can elect to pay either an ad hoc fee per additional instrument, purchase an additional package, or pay the difference between the value of the package that was originally purchased and the value of a larger package.

| Package Size    | Fee (Ex VAT) | ~Per Warrant |
|-----------------|--------------|--------------|
| 5               | R124 182     | R24 836      |

### Interest Rate Swap Futures

*\*Fees below are inclusive of VAT*

The fee model for Swap Futures is based on two tenor buckets, and the maintenance fee and roll fee will be the same per bucket. Fees are shown on a single contract with a notional size of R100 000 in the table below:

| Bucket | Tenor  | Fees   |
|--------|--------|--------|
| 1      | 1 - 2  | R 1.00 |
| 2      | 3 - 10 | R 2.00 |

There are four tenors currently available (1, 2, 5 and 10 years), and the table below summarizes the applicable fees

| Fees            | 1Y Tenor | 2Y Tenor | 5Y Tenor | 10Y Tenor |
|-----------------|----------|----------|----------|-----------|
| Trading Fee     | R 1.00   | R 1.00   | R 2.00   | R 2.00    |
| Maintenance Fee | R 1.00   | R 1.00   | R 2.00   | R 2.00    |
| Roll Fee        | R 1.00   | R 1.00   | R 2.00   | R 2.00    |

## Currency Derivatives

### Connectivity Fees

An amount of R1 342.51 (Ex VAT) charged on a monthly basis. This is a standard fixed fee and is regardless of the number of ComplID's utilized by the participant.

### Market Maker billing model

The model below recognizes the contribution of market-makers, and the fee model aims to incentivize the continuous growth of the market.

All prices below are exclusive of VAT

| Currency Futures and Options | On Screen  | MAXI On Screen | Off Screen | MAXI Off Screen |
|------------------------------|------------|----------------|------------|-----------------|
| Fee per contract             | R0.21      | R21.15         | R0.42      | R42.29          |
| Cap per deal                 | R25 603.58 | R25 603.58     | R25 603.58 | R25 603.58      |

In order to qualify for the on-screen fee incentive, the provider will have to meet the below qualifying criteria:

- All contracts will be divided into two categories, namely Category A and Category B contracts:
- **Category A:**
  - Category A comprises of the five most liquid instruments, where there are at least two providers making two-way prices on-screen in both the **near** and **middle** expiries.
  - These contracts and expiries form a part of the obligation to earn the beneficial pricing incentive.
- **Category B:**
  - Category B comprises of the least liquid instruments
  - These contracts and expiries do not form a part of the obligation to earn the beneficial pricing incentive, however, if a provider meets the minimum criteria in one of these expiries, the beneficial pricing will be applied.

| All other listed currency pairs (all expiries) |            | ✓          |

- The minimum qualifying criteria to which the providers will need to commit are as follows:
  - Must make two-way prices in the **near expiry of every liquid currency contract.**
  - Must make two-way prices in the **middle expiry of every liquid currency contract.**
  - Measurement will take place from start of day at 09h00 up until market close at 17h00.
  - Between **09h00 – 10h00** and between **16h00- 17h00**, providers must make prices for a **minimum of 85% of each period for the trading month.**
  - Between **10h00 – 16h00**, providers must make prices for a **minimum of 80% of this time period for the trading month (and not including the two periods above).**
  - The above will be monitored per Currency contract and per expiry.
  - On close out day the contract will be monitored up until the close of the contract (16h00 or 17h00 depending on daylight saving time).

*\*Please note that the qualifying criteria is subject to change.*

If the providers do not meet their on-screen obligations, they will pay the maximum possible fee (e.g. R0.42c per contract) as if they had traded a report only trade. The maximum fee is still lower than the average of the sliding scale that was applied previously. The JSE will invoice providers at the end of each month based on how they traded and whether obligations were met.

#### Billing rules for Currency Derivatives Trading Fees

| Functionality               | % Fee Discount |

| Tripartite                  | 50%            |
| Same day Trade Cancellation | 100%           |

1. **Roll trades** – Fee discount applied on each leg
2. **Same day Trade cancellation** – Fee discount applied on condition the trade cancellation functionality is utilised
3. **Next day Trade cancellation** - For valid corrections of erroneous trades or allocations on T+1, a value-based trade fee with a cap of R 856.67 per leg (Ex VAT) will apply. This capped fee will apply to the equal and opposite or reversal trade as well as the new correction trade or allocation. The JSE will verify that the trades booked on T+1 to correct erroneous trades or allocations are bona fide corrections and qualify for the aforementioned fee treatment.
4. **Autoclose trades** - 100% discount on autoclose trades only applies to Market Makers

### Trading Fee Incentives for Currency Derivatives

#### **Cross Currency Trades (Synthetic Crosses)**

Cross-currency pairs can be traded synthetically on the JSE and the JSE has committed to apply fees on only one of the trade legs of the cross-currency trade. Fees will be waived on the lower fee between the two trade legs.

The market will need to send an email to [zerofee@jse.co.za](mailto:zerofee@jse.co.za) requesting one leg of the trade to be zero rated, including the following information in the email: the JSE reference number, contract details, price and client code.

**Please note, this email is to be received before 17H30 on the trade date in order to allow for the fee exemption to be applied.**

If you would like any further information or clarity on any of the information provided, please email [irc@jse.co.za](mailto:irc@jse.co.za)

Please note: Should option positions be abandoned using the option abandon functionality, the JSE will charge the standard option fee for this transaction.

For all options exercised early or on expiration day, provided the system generated trades are left as is, no fees will be charged on the option leg together with the corresponding futures leg. The relevant exchange fees will be charged when the futures leg is closed.

All physically settled grain contracts with “assign send” or “tripartite send” legs will be charged a discount fee than the standard fee (VAT Incl) for executing members, while for accepting members the published standard fee shall apply. For all cash settled products, where variable fees exist per product, the “assign send” and “tripartite send” leg will be 50% less than the current published fee. This fee benefit will also be applicable to all listed quanto products and the Diesel contract

Members making use of the trade correction functionality to facilitate incorrect client allocations of the day will not be charged any additional fee, the usual exchange fee will be charged to the final position holder.
